SELF-SERVICE

PARTNER

PROGRAM

**UNATTENDED PAYMENT
SOLUTIONS / SEAMLESS
INTEGRATION**

A close-up photograph of a person's hand touching a metallic sensor on a self-service terminal. The background is a blurred retail store with shelves of products. The text is overlaid on the top half of the image in white and teal boxes.

**IMPROVE EFFICIENCY,
SERVICE AND CREATE
NEW BUSINESS
OPPORTUNITIES WITH
INGENICO'S SELF-SERVICE
UNATTENDED SOLUTIONS**

Ingenico's Self-Service Partner Program is comprised of kiosk providers, system integrators, value-added solution providers and payment solution providers who want to deliver secure unattended payment solutions. These solutions enable consumers to pay using the latest payment methods including EMV, QR codes, contactless cards and mobile wallets such as Apple Pay and Google Pay. In addition, support for Apple VAS and Google Smart Tap enables retailers to implement loyalty programs.

WHY

SELF-SERVICE

Ingenico's self-service unattended payment solutions help our partners and their customers prepare for the future by enabling acceptance of all payment methods, without the need for a cashier or attendant. These secure solutions enable businesses to improve transaction efficiency, enhance the customer experience, and create new business opportunities across various industries and use cases.

Ingenico caters to the following industries and use cases:

INDUSTRIES

- Retail
- Transportation & Airports
- Hospitality & Restaurants
- Vending
- Parking
- Financial & Banking Services
- Government & Municipality
- Medical & Health Services
- Micro Markets
- Car Wash
- Lottery & Gaming
- Education & Universities

USE CASES

- Ticketing
- Bill Payment
- Retail Pharmacy Dispenser
- Self-Checkout
- Drive-Thru
- QSR Food Order & Payment
- Self-Service Payment
- Driver's License Renewal
- Vending Kiosk
- Store Pickup - Locker
- Photo Kiosk
- EV Car Charging Station
- Patient Check-In
- Air & Vac
- Hotel Check-In
- Transit Payment

A man with dark, wavy hair and a beard, wearing a light blue t-shirt and brown suspenders, is looking down at a green folder or document. He is pointing at something on the folder with his right index finger. The background is a blurred outdoor setting with green foliage and a white structure.

WHAT

MAKES INGENICO'S

SELF-SERVICE

SOLUTIONS UNIQUE?

AS A PIONEER AND LEADER IN SELF-SERVICE PAYMENT FOR OVER 30 YEARS, INGENICO IS OFFERING A COMPLETE RANGE OF SELF-SERVICE SOLUTIONS TO COVER ANY USE CASE IN ALL VERTICAL INDUSTRIES.

With our new Self Series, Ingenico continues to invest and re-invent the self-service business by taking the customer experience to a new level of engagement and allowing for use in harsh environments. Installing and operating self-service unattended payment has never been so easy and secure.

Our self-service unattended solutions can be easily integrated by using the payment solution providers, system integrators, value-added providers and kiosk partners outlined in this brochure to create a secure self-service payment option. The payment solutions are designed from the ground up to deliver the reliability and durability required for self-service unattended environments. Ingenico provides the modularity and easy integration required by self-service kiosk integrators. Ready for use indoors or outdoors, our unattended solutions enable businesses to sell 24/7 and are not limited by traditional locations or hours. In addition to having the ability to work with loyalty and business applications, our solutions can also accept the latest payment methods including: EMV, NFC, QR code-based and mobile wallets such as Apple Pay or Google Pay. They leverage the same global EMV expertise, platforms (Telium 2 & TETRA) and integration kit as our other secure payment solutions. This can provide a single integration and single EMV/P2PE implementation that works across your entire range of payment solutions providing a significant reduction in certification time and expense. In addition, the Ingenico Self Service payment solutions are certified with the latest PCI PTS security standards and the product line meets the industry standards.

Company Overview

Banyan Hills Technologies is an Internet of Things (IoT) company and a trusted partner for innovative software solutions. Canopy™ is Banyan's IoT platform and the most advanced solution for monitoring and managing any network of connected endpoints like self-service kiosks, digital signs and on-premise control systems. Canopy helps decrease costs, increase revenue, enhance security, and leverage data for operators of large networks of unattended devices. Banyan's highly skilled team helps customers launch, scale and secure successful IoT implementations. Banyan's deep industry knowledge and strong capabilities in machine learning, transaction management, communication protocols, payments, and predictive analytics help companies realize the full potential of their technology strategies.

Value Add

Canopy provides businesses with measurable value and delivers results by:

- Decreasing costs through improved operational efficiency, and increased visibility into day-to-day operations;
- Increasing revenue by expanding existing and create entirely new revenue generating opportunities while improving the customer experience;
- Enhancing security through features that make Canopy an essential piece of the necessary infrastructure required to ensure overarching security requirements and standards are met;
- Leveraging data coming from IoT endpoints and sensors and making the utility of that data more accessible and actionable to an operator.
- Banyan's expertise in design, development, installation, and maintenance of computer hardware and software in the field of unattended kiosks and machines means you can do more and worry less. We make sure every aspect of your technology strategy moves your business forward.

KIOSK PROVIDER

Market Focus

Vengo's compact kiosks offer a powerful marketing and retail tech solution, reaching consumers on the go. Our network spans gyms, colleges, hotels and offices as well throughout the US. We're able to place our machine and offer our service in high traffic/ high value locations not previously available to vending via our slim, compact and non invasive design. These slim, sleek, high tech digital kiosks allow you to purchase or sample everything from smartphone chargers to makeup to candy with the touch of the screen and then out it pops from the machine. We now offer a variety of solutions for retailers looking to reinvent sampling and offer new ways to sell protected products.

Company Overview

Vengo Labs' digital kiosks offer a unique combination of unattended retail, data-driven product sampling and place-based digital out-of-home media, marrying the convenience of online shopping with instant access to products via brick-and-mortar retail. Whether enhancing the reimagined retail in-store experience or providing the right product at the right moment, over 1,400 Vengo digital kiosks meet consumers in the places they spend time and can be found in major markets in the US. Vengo now offers touchless transactions to complement touchscreen interaction.

Value Add

Vengo's network enable brands to connect with consumers in the places they go, in a contextual and relevant way, backed up by data and analytics. We deliver the right product and message to the consumer in an appropriate and impactful way.

Company Overview

At Worldnet we help businesses scale by simplifying payments. Our flexible end-to-end platform and team of payment experts unleash growth for ISVs focused on unattended retail, kiosks, AI-vending, arcade gaming, and transportation. Our scalable cloud platform provides a range of online and in-store EMV-enabled products and services across multiple channels including eCommerce, Mobile, POS and iPOS. Meet your customers' new digital shopping habits with tailored workflows, branding, centralized reporting, analytics, and tools designed for growth.

Value Add

We make payment integrations simple with multiple ways to integrate with our SDK and access to a wide range of hardware options. We work with a variety of merchant banks to get your customers set up and running seamlessly. Our unique approach also allows you the ultimate freedom and flexibility, so you can use our services with your existing processing relationship. Our Pre-Certified solutions support contactless payments including ApplePay & GooglePay. As a Level 1 PCI Compliant business we offer our customers a safe and secure way of accepting card payments while reducing their responsibility and requirements for the PCI DSS. This allows merchants to establish themselves as compliant with ease.
