ingenico

Optimising payments, Enhancing sustainability

A trusted range powered by Ingenico's proprietary OS.

Proven payment technology you can rely on

Built on decades of Ingenico payment expertise, TETRA is an established range of payment terminals powered by our proprietary OS. Designed for everyday payment needs, it combines proven reliability, consistent performance and a mature technology platform to support businesses across diverse payment environments.

Whether accepting payments at the counter, on the move, at a busy checkout or in an unattended environment, **TETRA provides robust, purpose-built solutions designed to keep payments running smoothly**.

With millions of terminals deployed and an extensive payment application base, TETRA benefits from a well-established ecosystem that addresses local payment requirements across markets and geographies.

25M+
terminals sold from its launch

Unattended terminals for Self Service businesses

Designed for unattended payment environments, TETRA self-service terminals support a wide range of applications, from vending and EV charging to parking and transportation.
Combining robust design, secure payment acceptance and flexible integration, the range enables reliable transactions across indoor and outdoor self-service environments.

Eco-design

Sustainability is integrated into the design of TETRA terminals, with a focus on optimising energy consumption, reducing the use of natural resources and improving repairability to help limit environmental impact throughout the product lifecycle.

Optimised energy consumption

Energy-saving modes and digital services help optimise energy consumption throughout the terminal lifecycle.

Reduced use of natural resources

Reduced plastic mass, smaller printed circuit boards and renewable or recycled packaging materials help limit the use of raw materials.

Repairability

Repairability is taken into account during product design to help extend terminal lifespan and reduce electronic waste.

Reducing environmental impact at every step

Powered by Ingenico 360

Ingenico 360 provides a comprehensive services ecosystem supporting TETRA terminals throughout their lifecycle. From payment and business applications to device management, security, merchant services and analytics, customers can benefit from Ingenico's broader ecosystem to **manage, protect and optimise their payment operations**.

Combined with TETRA's proven payment technology, Ingenico 360 brings together the tools, services and expertise needed to support **secure, efficient and reliable payment acceptance**.

Moving Commerce Forward

Ingenico is the smart technology powering in-person commerce. Every day, its intelligent solutions help businesses turn millions of payment interactions into opportunities to deliver superior customer experiences, build loyalty and increase revenue.

With more than four decades of innovation and expertise, over 3,000 employees worldwide, and tens of millions of devices deployed across more than 120 countries, Ingenico combines seamless acceptance with powerful data and insights. Its intelligent solutions help businesses reduce complexity, grow faster and get more from every customer interaction, backed by the reliability, security and trust for which Ingenico is known.
